FOR MEN

NEW LOGO - NEW HISTORY

The Tree of Life, a symbol that goes back to Ancient Egypt, Mesopotamia, and the Celts, and also found in Ancient Turkish culture, signifies the human being, life, roots, fertility, peace, and harmony which stands for the forces of nature. It represents the positive qualities of our brand, the importance we give to wellness, beauty, and our company values. The smooth transition between soil, water, and leaves in the logo describes the aliveness presented by nature and life.

Organic forms that signify the geometry in nature are

presented in a round form that represents positive notions such as inclusiveness, unity, and friendship.

The gray tones used in our personal care product packaging, which are produced only for men, emphasize the simple, natural and elegant style just like our product formula.

The typographic solution for the logo has a modern and simplified form. It is aimed to be memorable, legible as well as conveying a feeling of reliability as well as positive emotions for our brand.
